Source: Unsplash

The US Department of Justice has updated its guidelines for corporate compliance programs, requiring companies to consider risks posed by emerging technologies like AI. The revised guidance requires compliance officers to balance AI's benefits with its risks, particularly in criminal law compliance. It also emphasizes data analytics and stronger whistleblower protections, signaling a shift towards performance-based compliance.

2. YouTube Expands Access to Its Own Gen AI Assistant

Source: [Social Media Today](#)

Source: Unsplash

YouTube is expanding its AI chatbot, initially launched for Premium subscribers in the U.S., to Android users. The chatbot allows users to ask questions and receive personalized suggestions, providing valuable data on user interactions. Although not revolutionizing video engagement, it could play a significant role in future AI integration.

OpenAI is planning to restructure into a for-profit benefit corporation, separating from its non-profit board to attract more investors. The non-profit will retain a minority stake in the new entity. CEO Sam Altman will receive equity in this for-profit structure, potentially valued at \$150 billion post-restructuring, aimed at increasing investor returns. The restructuring aims to enhance governance over AI risks. Leadership changes, including the departure of CTO Mira Murati, accompany these moves, while the details and timeline of the restructuring are still under discussion with legal and shareholder input.

Past Events

A poster for the 1st Cambodia's Science, Technology, and Society (STS) Symposium. It features four speakers: A/Prof. Gregory Clancey, Prof. Chhem Kieth Rethy, Dr. Park Jaesig, and Dr. Hul Seingheng. The event is scheduled for 20 Sept, 2024, at 8:00am. A QR code and a 'Register Now' button with the phone number +855 11 952 772 are also present. The event is organized by CamTech University Campus, 6th floor.

20th September:

1st Cambodia's Science, Technology, and Society (STS) Symposium took place at CamTech University Campus.

Upcoming Events

A poster for AI Conversations Episode #2. The title is "Transforming Healthcare: The Role of AI in Global and Cambodian Medical Practices". The moderator is Mr. Say Vithya Arthur, and the speaker is Mr. Cheab Sambath. The event is organized by AI Forum.

27th September:

5. Microsoft introduces new feature which can automatically correct inaccurate AI content

Source: [India Today](#)

Microsoft has introduced "Correction" as part of its Azure AI Content Safety API to address AI hallucinations. The feature detects and rectifies inaccuracies in AI-generated content by cross-referencing it with verified data. It aims to improve AI reliability, especially in sensitive fields like healthcare. Microsoft also introduced updates to enhance security, safety, and privacy of AI systems, including confidential inferencing.

6. Meta Connect 2024: Orion glasses, Quest 3S headset, Meta AI upgrades, Ray-Ban Meta real-time video, and more

Source: [TechCrunch](#)

Meta Connect 2024 highlighted Meta's ongoing focus on AI and the metaverse, showcasing innovations like the Orion AR glasses and the affordable Quest 3S headset. CEO Mark Zuckerberg also introduced upgrades to Meta AI, including real-time voice interactions and the release of Llama 3.2. Additionally, Ray-Ban Meta smart glasses received enhancements like real-time video processing and language translation. These developments reflect Meta's ambition to push boundaries in both virtual reality and AI technology.

7. Dame Judi Dench and John Cena to voice Meta AI chatbot

Source: [BBC News](#)

Meta, parent company of Instagram and Facebook, has introduced a new lineup of celebrity AI chatbot voices, including Dame Judi Dench and John Cena, to improve user experience. The company also integrates photo recognition and image editing features, and has introduced Orion AR glasses and Quest 3S headsets. Meta faces scrutiny over data use, but offers an opt-out process via its privacy settings.
